

12.5X Zoom Lens Series

PMS-Z125M

1. Telecentric optical design. Magnification range: 0.58x-7.5x, magnification ratio is 12.5:1
2. Field of view: 1.47-18.97mm(based on 2/3"CCD)
3. Excellent performance, with high resolution, low distortion and super big N.A.
4. Compact design,easy assembly and installation.

Function and Feature

■ Motorized Zoom

- High speed in zoom and focus and high accuracy in repetitive positioning
- Imported DC servo motor, closed-loop control
- Stable quality performance even in the strong vibration environment

■ Motorized Controller

- The integrated motorized control systems are available for all the POMEAS zoom lenses
- Motorized controlling system can control single or dual channels via RS232 or USB
- Underlying sourcing code will be provided
